dental cleaning reminder

human energy. yours.™

get a dental cleaning in 2018, avoid the dental surcharge in 2019

If you are currently enrolled in the **Chevron Dental PPO** or **Dental HMO Plan** in 2018, you're encouraged to take steps to protect your health and receive at least one preventive dental cleaning* between January 1 and December 31, 2018. **If you do not participate in this preventive care measure in 2018, you will pay \$120 more for your annual Dental PPO or Dental HMO Plan premium in 2019.** It's still your choice to receive a cleaning or not, but if you choose to participate, you'll save money in 2019 and you'll be doing something good for your health.

We know dental exams — like many other [preventive care](#) exams — aren't exactly fun. But there's a reason they are covered by your plan; they are important to good health. Chevron's dental plans already cover at least two preventive dental cleanings per year; that will continue in 2018. And covered preventive dental services are generally 100 percent paid by your plan, with no annual maximum, deductible or copayment when you use a **network** provider.

You do not need to do anything to report completion of your cleaning in 2018. Your Chevron dental plan and the HR Service Center will conduct a separate verification process *next year* to determine if the dental surcharge applies to you.

** For participants with dentures, receive at least one oral exam in lieu of a cleaning.*

For more information about contacting your dental plan and finding a dental provider, see the Chevron dental information available on hr2.chevron.com.
