

how to find your employee ID

If you access the WebMD Healthy You website from the Chevron intranet using a company workstation, modern desktop, or Chevron remote access, you can use the site's automatic sign-in technology to register and use the website. **But if you access the site from outside the Chevron intranet, automatic sign-in is not available and you need to provide specific information to register and use the site, including your Unique Identifier (Employee ID).** Your Employee ID is a unique identifier provided to all employees; please note your Employee ID is only available from Workday so you'll need to have access to the Chevron intranet to locate it. You need only provide it once, at registration. Here's how to locate your Employee ID.

find your Employee ID in Workday

1. Go to [Workday](#) from the Chevron intranet.
2. Navigate to the **person icon** in the upper right.
 - Click the person and then click **View Profile**.

3. In the left navigation, click **Job**.
 - Under **Job Details**, your **Employee ID** is included on the chart.
